Quick guide / User Manual

Vertical Mouse Evoluent 3

BAKKER ELKHUIZEN

Evoluent™
Inventor of the handshake grip

Vertical Mouse
Evoluent 3

With a standard mouse, the wrist is fully turned, i.e. the palm faces downwards. This is not a natural posture.

When you place your wrist in the 'handshake grip' position, it has assumed a neutral posture.

This is easier to maintain and is, at the same time, more pleasant. And the more comfortable you are sitting in front of your computer, the more productive you are.

The Evoluent Mouse is the most advanced vertical mouse in the BakkerElkhuizen product portfolio.

Vertical Mouse
Evoluent 3

Standard button settings

1. Top button - left click
2. Wheel button - middle click (pan and rotate in some programs)
3. Middle button - right click
4. Bottom button - back
5. Thumb button - forward

Vertical Mouse
Evoluent 3

Adjusting speed

Press the button on the bottom
until the light is blue.

Windows Install

Before connecting Evoluent Mouse, go to Control Panel, Add or Remove Programs and remove any previous Evoluent Mouse Manager and any other mouse software, except touchpad driver. If there is no mouse software listed, skip this step.

- Before connecting the Evoluent Mouse, go to Control Panel, Mouse, and:
  1. Uncheck the box for Swap Primary and Secondary Buttons.
  2. Check the box for Enhance Pointer Precision. This is very important.
  3. In Pointer Options, set the pointer speed slider to the middle position.
- Insert the USB connector into a USB port directly on the computer.
- If the Add Hardware Wizard appears, do not select Search for Best Driver, but choose Display All Drivers, and select Human Interface Device (HID) Compliant Mouse.

Mouse Properties

Buttons | Pointers | Pointer Options | Wheel

Button configuration

1 ☐ Switch primary and secondary buttons

Select this check box to make the button on the right the one you use for primary functions such as selecting and dragging.

Double-click speed

Double-click the folder to test your setting. If the folder does not open or close, try using a slower setting.

Speed: Slow ——————— Fast

ClickLock

☐ Turn on ClickLock   Settings...

Enables you to highlight or drag without holding down the mouse button. To set, briefly press the mouse button. To release, click the mouse button again.

OK   Cancel   Apply

Mouse Properties

Buttons | Pointers | Pointer Options | Wheel

Motion

Select a pointer speed:

3

Slow ——————— Fast

2 ☑ Enhance pointer precision

Snap To

☐ Automatically move pointer to the default button in a dialog box

Visibility

☐ Display pointer trails

Short ——————— Long

☑ Hide pointer while typing

☐ Show location of pointer when I press the CTRL key

OK   Cancel   Apply

Tip

Combine the Evoluent Mouse with a compact keyboard to reduce Arm strain by reaching to the mouse.
